Image File Format

Document images are stored in multi-page TIFF file format. Images are compressed using CCITT-4G compression. Files are named with the document identifier; either reception number or a book-page reference.

Index Data

Recorder index data can be purchased. The data is exported to an ASCII text file and contains a standardized format. Each file contains layout information to facilitate import of the data into other systems.

The cost to purchase index data for each Recorder's Office is shown in the following table. There is a \$150 per export processing and shipping fee in addition to the data fee.

Index data can be delivered by email, ftp or optical media.
